

Homeowner Maintenance Guide

1.5-2.5
inches

1 inch
per week
total

Preventative
Fungicide &
Insecticide

Spring

- Mow your Palmetto St. Augustine between 1.5 and 2.5 inches tall.
- Apply pre-emergent herbicide. This will cut down on summer weeds.
- If you have had insect problem in the past, treat with broad-spectrum insecticide. If you use a granular variety, water the lawn immediately after application to help get it into the soil. Make sure it has control for chinch bugs.
- Don't overwater. In the active growing season, Palmetto needs about one inch of water a week, from natural rainfall or irrigation. Too much water can cause fungus.
- Apply fungicide if needed. If you have had a fungus or disease in your Palmetto in the past or have quite a bit of shade in the yard, apply a systemic fungicide to prevent future outbreaks.
- Feed your lawn with **Lawnifi** the preferred fertilizer for Palmetto St. Augustine.

Summer

- When mowing, never remove more than 1/3 of the leaf blade at a time. If you need to cut more than 1/3, consider multiple cuts over three to five days.
- Do not overwater the grass. Palmetto only needs about one inch of water weekly. Water for longer periods of time, less frequently, and in the early morning hours. Take rainfall into consideration.
- Feed your lawn with **Lawnifi** the preferred fertilizer for Palmetto St. Augustine.

Fall

- Apply fungicide. This will help the grass enter colder months in healthier condition. If you have had fungus before, you may need multiple applications in affected areas.
- Treat with broad-spectrum insecticide. If you use a granular variety, water the lawn immediately after application to help soil absorption. Make sure it offers control for chinch bugs.
- Mow less in cooler fall months. Leave your Palmetto lawn slightly higher than normal to encourage deeper root growth for winter. Adjust mower settings up one notch.
- Water less. As temperatures drop grasses don't need as much irrigation. Too much watering can lead to lawn disease.
- If you haven't had past problems with winter weeds, you can forgo herbicide in the fall. If you do get winter weeds, apply a pre-emergent herbicide for prevention.
- Feed your lawn with **Lawnifi** the preferred fertilizer for Palmetto St. Augustine.

■ Boost
■ Maintain
■ Recover

Grow

Designed for sodding, sprigging and seeding, Grow helps to quickly establish roots via highly available phosphorus and potassium. Grow benefits rooting, plant strength, and soil quality. Apply Grow to soil and plants at the time of installation for best results.

Maintain

Maintain is designed to provide enhanced color with iron and nitrogen. At the same time, Maintain fortifies plant and root zones with potassium, amino acids, and carbon for increased microbial activity and soil structure.

Recover

Recover is a powerful and balanced nutrition package that delivers the micronutrients, iron, nitrogen, and carbon needed to grow a healthy lawn. Recover has the ability to fight through seasonal and environmental stress.

Boost

Boost is a controlled release nitrogen package that greens up grass quickly and continues to feed for up to six weeks. Boost works fast to enhance the color, density, and health of lawns.
